SUMMARY

Aspiring Data Engineer & Junior Developer with a solid foundation in **data engineering, frontend development, and operations**. Skilled in **SQL, PostgreSQL, Python, and React**, with hands-on experience delivering projects that combine technical and operational impact. Currently pursuing **Data Engineering at LuxDevHQ** to strengthen expertise in building scalable, data-driven systems.

SKILLS

Data Engineering & Databases:	Programming & Development:	Tools	Soft Skills:	Operations Knowledge
SQL	Python	Git/GitHub	Problem-solving	Logistics optimization,
PostgreSQL	React	VS Code	Teamwork	process automation
DBMS	TypeScript	Docker and FastAPI	Customer-focused solutions	
	Tailwind	Git and Linux		
	HTML, CSS and JS	Postman		

Projects

VibePrint Hub – E-commerce site for a branding company
 https://safaris-nine.vercel.app/ | *in Production*

- Modernizing https://viagensafricasafaris.com/ for a client

MyKlub – Portfolio & collaboration platform for creatives
 my-klubb.vercel.app | *In production*
- Designed and developed a React + TypeScript frontend to showcase work.
- Built authentication and portfolio upload features.

M-PESA API Integration – Payment automation demo
- Designed and developed a React + TypeScript frontend to showcase work.
- GitHub Repo | *Completed*
- Tested Daraja API with Postman to enable mobile money payments.

Other Projects:
- Jurn Events – Static website for event planning – Link

EXPERIENCE

Software Development Intern – Full-Stack Web Development at Learnsoft Beliotech Solutions Limited · Internship
 Nairobi County, Kenya · Remote -Jul 2025 – Present · 2 mos
- Built a PostgreSQL-powered backend for a scalable company website.
- Designed and optimized relational database schemas for content, jobs, and media.
- Used ERD tools to document relationships and maintain clear database structures.
- Wrote SQL queries for reporting, analytics, and data validation.

Junior Data Scientist (Trainee)-LuxDevHQ & Data Science East Africa | Nairobi, Kenya June *2025 – Present* **Present : Full Time**
- Currently training in data science and machine learning, with exposure to real-world projects.
- Learning how to build ML models (classification, regression) and deploy them in practical settings.
- Gaining hands-on mentorship from senior data scientists on topics like LLMs, MLOps, and data visualization.
- Collaborating with peers to develop mini AI tools (e.g., text summarizers, forecasting models).
